

Model NPS19C

Product Overview

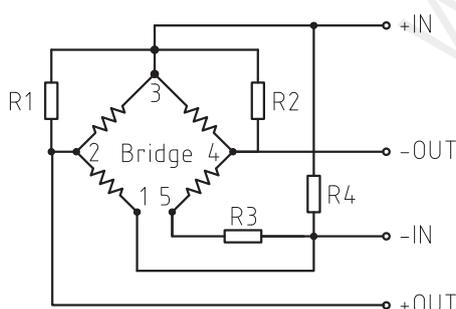

NPS19C is made from silicon piezoresistive sensor chip. The piezoresistive sensor chip is packaged in a fluid-filled cylindrical cavity and isolated from measured media by a stainless steel diaphragm and housing. NPS19C is temperature compensated and zero correction by using resistance technology. The sensor has a smaller thickness. The smaller volume is suitable for limited space.

NPS19C pressure sensor are designed for floating O-ring seal mounting. This not only can avoid housing induced stress, but also is easy for installation.

Applications

- Process control systems
- Refrigeration and HVAC controls
- Hydraulic systems and valve
- Pharmaceutical engineering
- Level measurement
- Ship and marine systems
